## EXPERIENCE

### CodTech IT Solutions

Jan 2025 – Feb 2025

Machine Learning Intern

Hyderabad, Telangana, India

- Designed end-to-end supervised learning pipelines on structured real-world datasets, covering data ingestion, feature engineering, model training, cross-validation, and performance evaluation.
- Built and benchmarked classification algorithms; improved model accuracy through hyperparameter tuning, feature selection, and iterative refinement under professional mentorship.
- Maintained version-controlled, reproducible code and delivered structured documentation and performance reports to the mentoring team.

## PROJECTS

### Multi-Modal Cancer Detection Framework

Dec 2025

Python · CNNs · Ensemble ML · SHAP · Grad-CAM · Scikit-learn

- Designed a hybrid architecture fusing CNN-extracted image features with structured EHR clinical records, improving detection accuracy over single-modality baselines.
- Integrated Grad-CAM heatmap visualisations to provide region-level explanations, enabling clinical teams to audit and trust model predictions.

### Healthcare AI Recommendation System

Jan 2026

Python · SVM · Random Forest · Flask · REST API · Scikit-learn

- Built a multi-output symptom-to-diagnosis engine returning ranked disease classifications, medication suggestions, and personalised workout recommendations in a single API call.
- Deployed the model via Flask REST API with consistent sub-second inference; validated and tested all endpoints using Postman.

### NPA Risk Prediction System

Feb 2026

Python · Logistic Regression · Random Forest · SVM · SHAP

- Trained a loan-default classifier to proactively flag non-performing assets, enabling early risk intervention.
- Integrated SHAP explainability layers for per-prediction feature attributions, satisfying compliance and audit requirements.

### Diabetes Risk Prediction System

March 2026

Python · LightGBM · SHAP · LIME · SMOTE

- Achieved 85% accuracy with LightGBM using SMOTE oversampling to address class imbalance in the medical dataset.
- Applied SHAP and LIME to surface top risk-driving features, delivering interpretable clinical decision support.

### Air Quality Intelligence System

April 2026

Python · XGBoost · SVM · Random Forest · Flask · Live APIs

- Ingested live data streams from public AQI APIs and trained an ensemble forecasting model with automated hazard-threshold alerting.
- Deployed an interactive global monitoring dashboard via Flask, visualising real-time AQI predictions across geographic regions.

## EDUCATION

### Guru Nanak Khalsa College of Arts, Science & Commerce (Autonomous), Matunga

Aug 2024 – May 2026

MSc Computer Science | University of Mumbai

Mumbai, Maharashtra, India

### Guru Nanak Khalsa College of Arts, Science & Commerce (Autonomous), Matunga

Aug 2021 – May 2024

BSc Computer Science | First Class with Distinction | University of Mumbai

Mumbai, Maharashtra, India

## SKILLS

**Languages:** Python, JavaScript, SQL, Java, HTML

**ML / AI:** Scikit-learn, LightGBM, XGBoost, CNNs, NLP, Computer Vision, Model Evaluation, Feature Engineering, Deep Learning, Pytorch, Tensorflow

**Frameworks:** Flask, REST APIs, Pandas, NumPy, Feature Engineering

**Explainable AI (XAI):** SHAP, LIME, Grad-CAM, Differential Privacy

**Backend:** Flask, Node.js, Express.js, REST API Design, API Integration

**Frontend:** HTML5, CSS3, JavaScript (ES6+), React.js, Responsive UI Design

**Databases:** MongoDB, MySQL, Firebase, Git, Postman, VS Code, Docker

## CERTIFICATIONS

- ML Internship — **CodTech IT Solutions**
- Frontend Web Development — **Bloomzen Infosolution Pvt. Ltd.**
- Mastercard Cybersecurity Simulation — **Forage**
- Typing speed 30 English — (GCC-TBC)
- AI Agent Development — **Google**
- Software Testing — **Bloomzen Infosolution Pvt. Ltd.**
- Tata Cybersecurity Analyst — **Forage**
